CRONIMET
Ferroleg. GmbH

CRONIMET Specialty Metals Group (SMG) is a dedicated business unit of the **CRONIMET Group**. We are a system provider for the specialty and vacuum foundries within the range of Super Alloys, Special Alloys, Titanium, Tungsten Carbides and Precious Metals. We are offering to our customers primary materials such as ferro-alloys and metal powders as well as secondary materials.

As a family-owned company the personal contact with our customers and suppliers on a day-to-day basis is important to us, so that we can identify, understand and consequently meet their needs.

With our 40 years of experience and expertise we have been a reliable and competent partner to our customers.

We guarantee a very high quality of our products even to the tightest specifications. A high rate of flexibility and efficiency in our organization allows us to meet any given demand and requirement even at short notice.

METALLOY Metalle-Legierungen GmbH

Specialty Metals Group

CRONIMET

CRONIMET
Ferroleg. GmbH

Our Company was founded in 1980 and is the starting point of the entire CRONIMET Group. We are now one of the world's leading stainless steel and special alloys scrap processors. As for SMG we are specialized in the trading and processing of Titanium, Tungsten Carbide and HSS scrap.

**WE OFFER OUR CUSTOMERS EXPERTISE
IN THE FOLLOWING SERVICES:**

- *Scrap collection and processing*
- *Revert management of scrap solids and turnings*
- *Warehousing*
- *Risk management (hedging)*
- *Financing solutions*

**CR Ferroleg. is ISO 9001:2008 and
"Specialized Waste Management
Company" certified.**

Our company was founded in 1974 and joined the CRONIMET Group in 2006. We have always been a reliable partner and certified processor for the worldwide vacuum and aeronautical industry, assuring that due to our state of the art technical and environmental friendly equipment the complex alloys are treated professionally and remain in a closed loop.

OUR CORE BUSINESS IS:

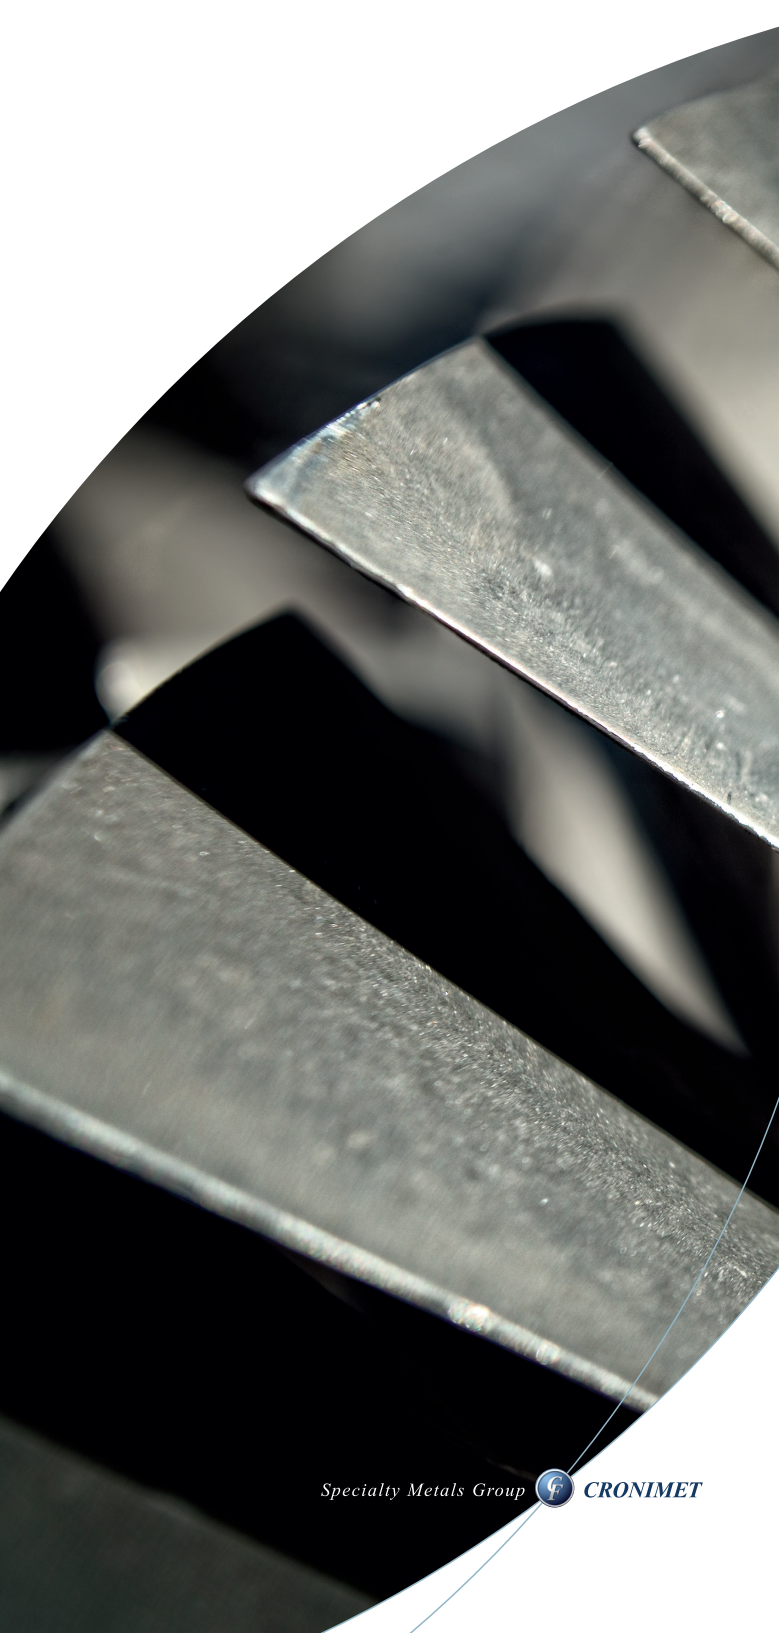

- *The recycling and processing of superalloy scrap, corrosion -and heat-resistant materials on Nickel, Cobalt and Titanium basis*
- *Toll processing of scrap solids and turnings*
- *Revert management of scrap solids and turnings*
- *Stockholding of all common grades of high-temperature und corrosion-resistant alloys prepared for vacuum applications.*
- *Price-, risk-, stock- and logistic-management for our customers*

METALLOY is ISO 9001:2008 and “Specialized Waste Management Company” certified.

CRONIMET

United Alloys & Metals

Our Company was founded in 1973 and joined the CRONIMET Group in 2002. With almost 40 years experience and 2 facilities on the US ground, we are a key and trusted supplier to all of the major aerospace and industrial melters in North America.

Our dedication to quality, ongoing training of personnel and continued up grade of equipment keeps us poised to meet the demands of our customers. From sale material to scrap return programs to toll processing, we are a dedicated partner in the Titanium and Super Alloy and industries.

WE ARE EQUIPPED TO HANDLE ALL SIZES AND FORMS OF SCRAP:

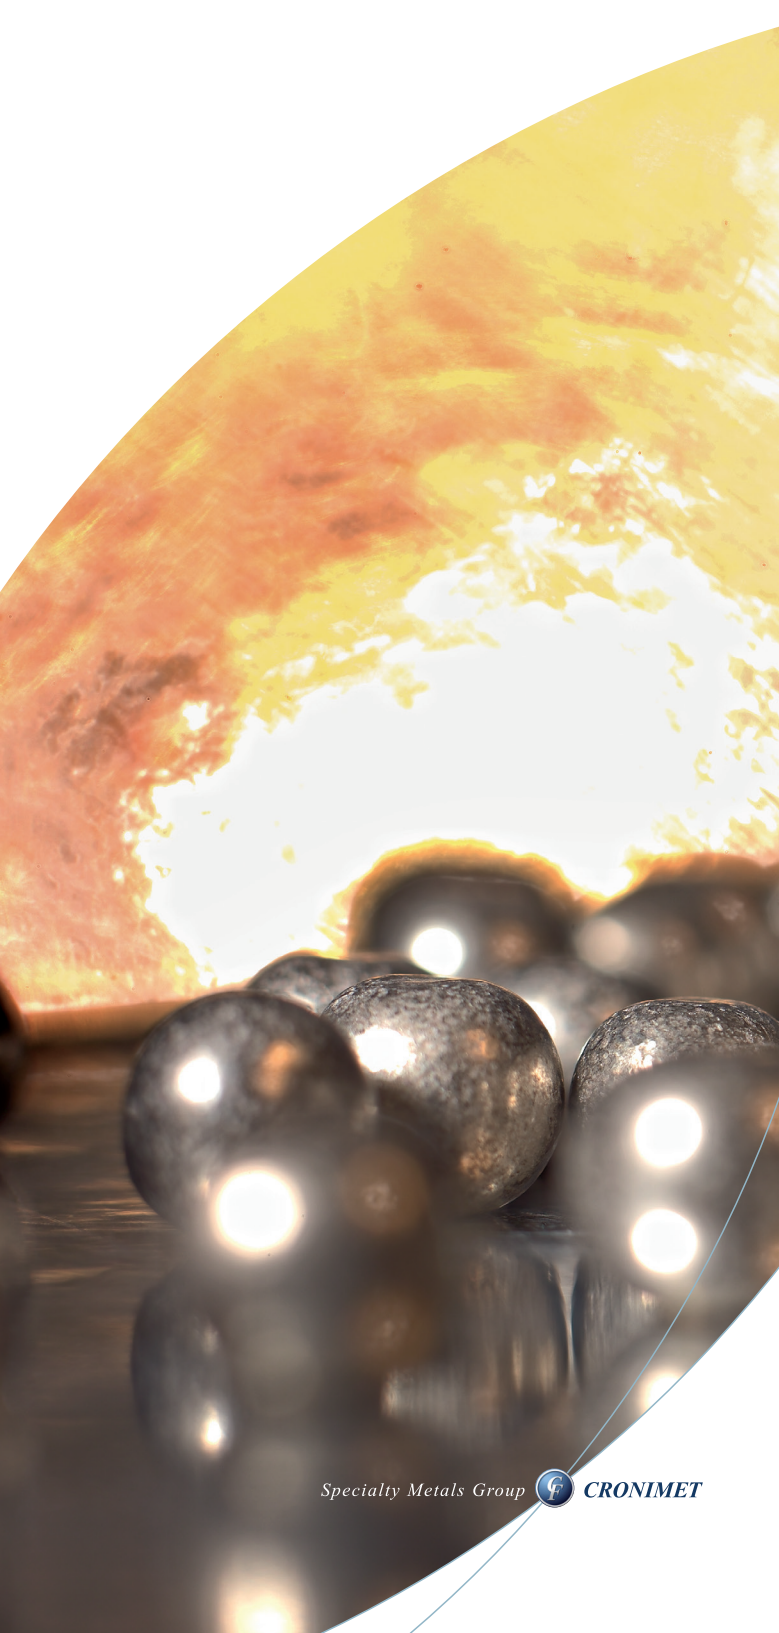

- *Larger items are torch cut, saw cut or sheared*
- *Thinner gauge materials are cobbled or briquetted*
- *Turnings are sorted and graded prior to being crushed. After the turnings are crushed they are degreased and cleaned. During the cleaning process, samples are taken to ensure conformity to specification.*

United Alloys and Metals is ISO 9001:2008 and “Specialized Waste Management Company” certified.

Specialty Metals Group  **CRONIMET**

metals are our **PASSION**

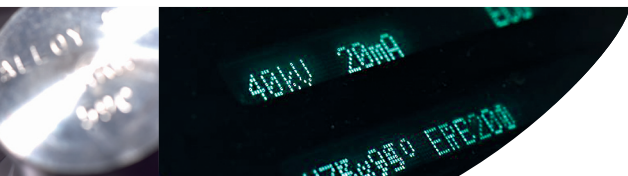

The Titanium and Super Alloys recycling business requires expertise and precision.

Absolute adherence to customer's specifications is a necessity as specialty and vacuum melters require a high accuracy in terms of chemical composition, size and surface conditions.

Our material is running completely through sorting, grading and cleaning processes. Those procedures guarantee a reliable and repeatable product quality by removing any type of contamination. To ensure our customers this highest quality standard a 100% of the material undergoes a final quality inspection prior shipment.

Our in-house laboratories include button and ingot furnaces as well as a full range of state of the art testing equipment from spectro-analysis to x-ray machines.

We are always committed to stay on top of the processing and analyzing technologies.

In addition to our ISO9001:2008 certification, we have the full range of certifications from the aerospace and engine manufacturing industries to supply vacuum grade scrap for remelting. These companies perform regular audits of our processes, materials and facilities which we consistently pass with great success.

Our processes have now been tested and improved for more than 30 years, which drive our passion.
