

Appointment of Ms Annette Gartner as another managing director of CRONIMET Holding GmbH

CRONIMET Holding GmbH shareholders have appointed Ms Annette Gartner as another managing director of CRONIMET Holding GmbH with effect from 1 July 2017. Ms Gartner has already worked for the company since 2006 and was most recently partly responsible for the successful SAP launch for the entire group. She is also a member of the regional board for European business.

Particularly in consideration of global digitalisation and lack of specialists, the CRONIMET management team has developed areas of action in the last 12 months that CRONIMET would like to give more attention to in the future and in which the appropriate investments will be made in order to maintain and expand the CRONIMET Group's competitive position. In this respect, the decision has been made that both HR management and digitalisation will be represented in a separate managerial role in the future in the form of Ms Gartner.

“We have gained a highly competent and experienced manager for our management team with Ms Gartner and in doing so we will gain significant speed in the key areas of HR development and digitalisation”, Shareholders and CEO Jürgen Pilarsky, together with his management colleagues Bernhard Kunsmann and Oliver Kleinhempel, are pleased with the addition to the management team.

About the CRONIMET Group

The CRONIMET Group, headquartered in Karlsruhe, is a worldwide specialist for stainless steel scrap, ferroalloys and primary metals. For three decades CRONIMET has been a supplier of raw materials for the industrial production of stainless steel. The focus lies on Trade & Sales, Recycling and Production & Services. The company founded in 1980 is currently present at 62 locations around the world with a headcount of more than 5,000.
